About Us

- At Failaka, we are proud to deliver exceptional products, innovative solutions and experience-led designs that speak to our almost 30 years of expertise in the swimming pool and water features business.
- We offer specialized solutions for both commercial and residential aquatic projects and understand the nuanced process from designing to handing over and beyond, we are your partner from beginning to end.
- Failaka has the best ways to design and build your swimming pool & water features from your idea to your first swim, unique concepts blended with capability and creativity makes us stand apart in the masses.
- Failaka has approval from the Ministry of the public works and Amiri Diwan.
- Our Mission is to deliver substantially high level of quality, unique products with customer satisfaction.
- We Offer design services to architects, engineers and developers for the design and development of swimming pools, Fountains, Fire features and Water Parks.
- Our aim is to create innovative and sustainable water features.
- Failaka is a Kuwaiti-based company founded and managed by Kuwaitis since 1994.

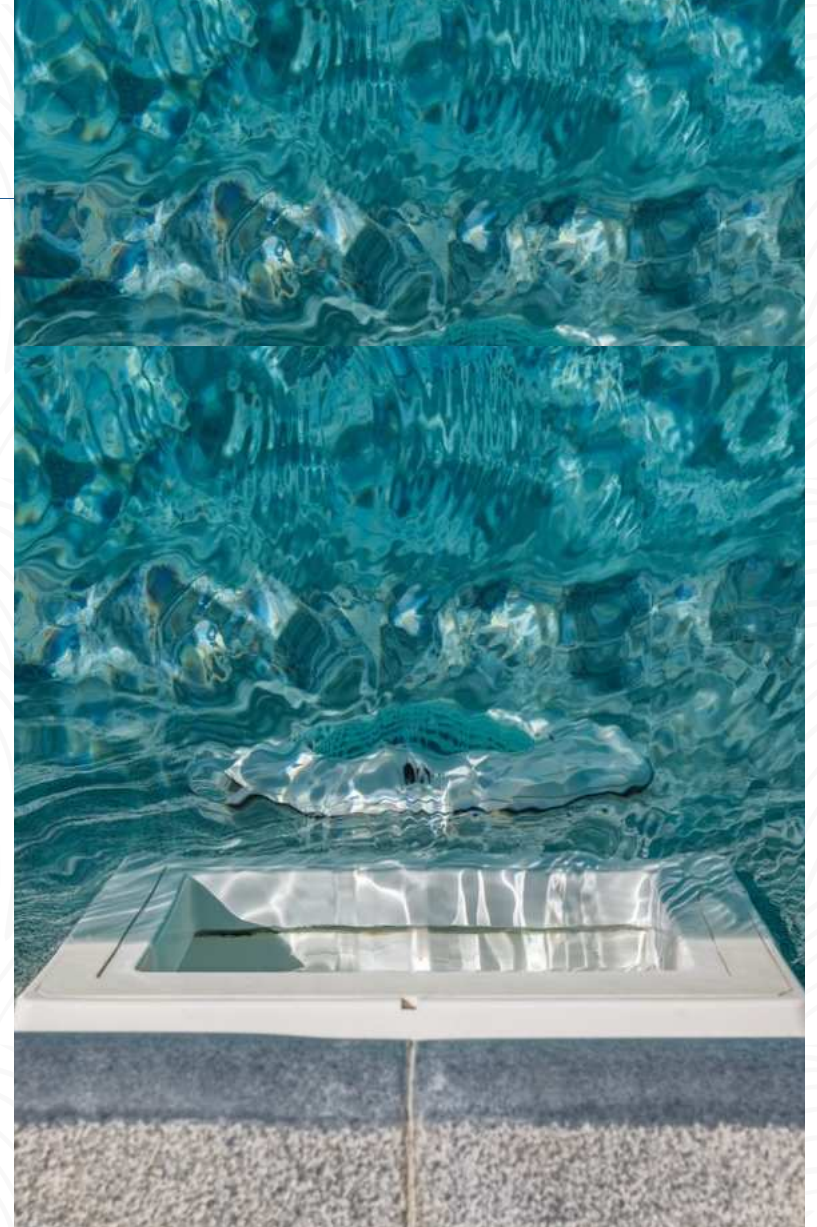

**QUALITY AND CUSTOMER CONFIDENCE
ARE OUR MAIN PRINCIPLES.**

1.1 Skimmer System

Failaka has successfully executed several prestigious swimming pool projects for commercial and residential complexes, private villas and health clubs.

The water level on this system is between 10-15cm below the deck as shown above.

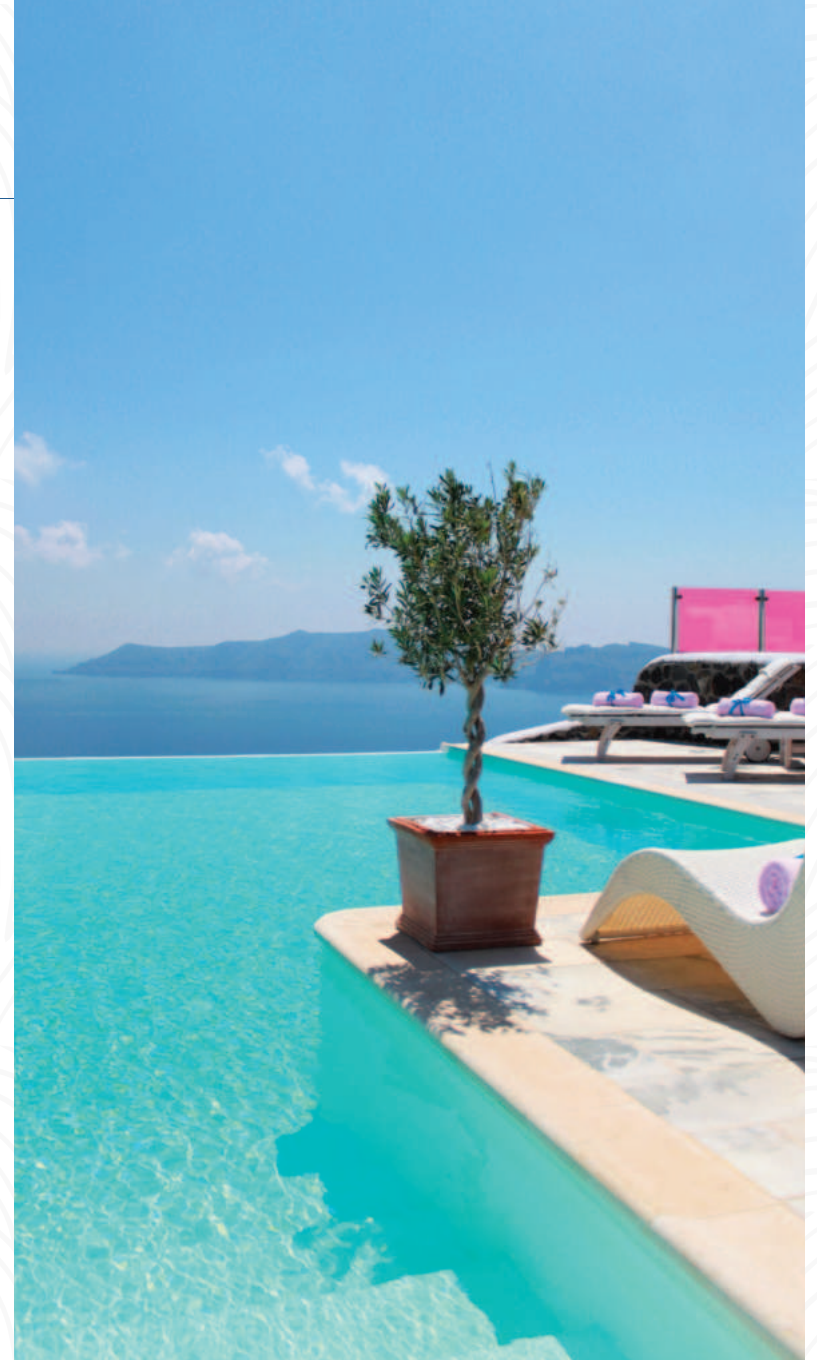

1.2 Overflow System

In the overflow system the water level will be same the deck level, the water will flow through special channel surrounding the swimming pool and goes back the balance tank.

1.3 Infinity System “Endless Pool”

An infinity pool is sort of like a waterfall with a single lower level—one section of the pool’s edge is lower, acting like a dam which overflows into a lower catch basin. From there, water is pumped back into the upper pool to create a continuous overflow.

2.0 Fountains

Failaka specializes in the design and supply of high-quality fountain products and water features for residential and commercial applications.

3.0 Fire Feature

Fire Feature gives an elegant touch and sophisticated, modern edge to any place.

4.0

Waterfall

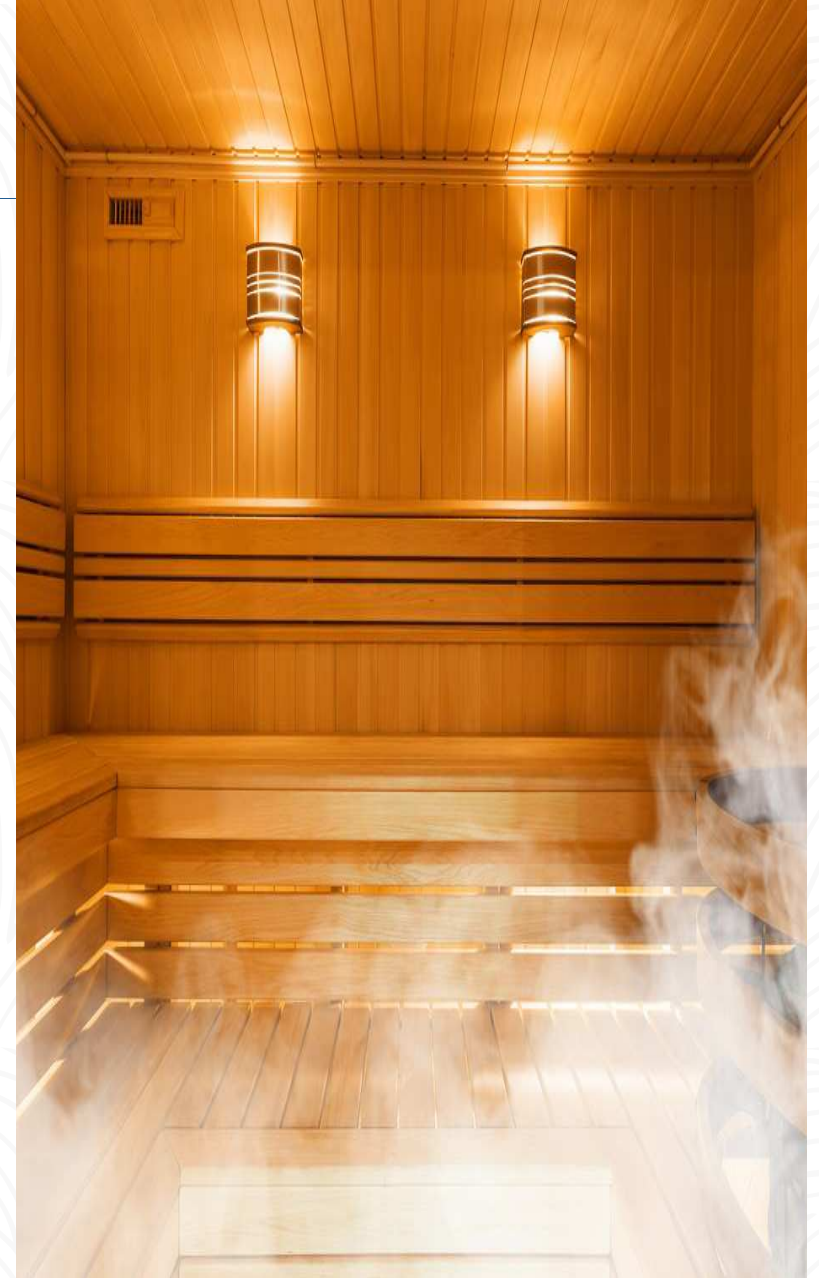

Failaka has executed many waterfall projects in Kuwait (Government and Private Sectors).

With waterfall in your place, you are able to enjoy the relaxation and peace of mind specially the lighting system that will make you comfortable and touch your soul.

5.0 Steam Room

Sitting in a steam room might significantly improve your cardiovascular health. A study Trusted Source of older individuals showed that moist heat improved circulation, especially in extremities. Improved circulation can lead to lowered blood pressure and a healthier heart. It can also promote healing of broken skin tissue.

6.0 Hot tub

Regular Hot Tub use, through a combination of buoyancy, heat and massage relieves tension and stress. Buoyancy eases pressure in joints and muscles, while heat increases blood flow to muscles and accelerates healing.

Minimize the pain of arthritis

For people with arthritis, the Arthritis Research Campaign recommends using a hot tub as an excellent way to apply heat to arthritic joints.

Benefits of a soak in a hot tub can include muscle relaxation, decreased pain and joint stiffness and greater ease when performing exercise and daily activities.

Lower diabetic blood sugar levels

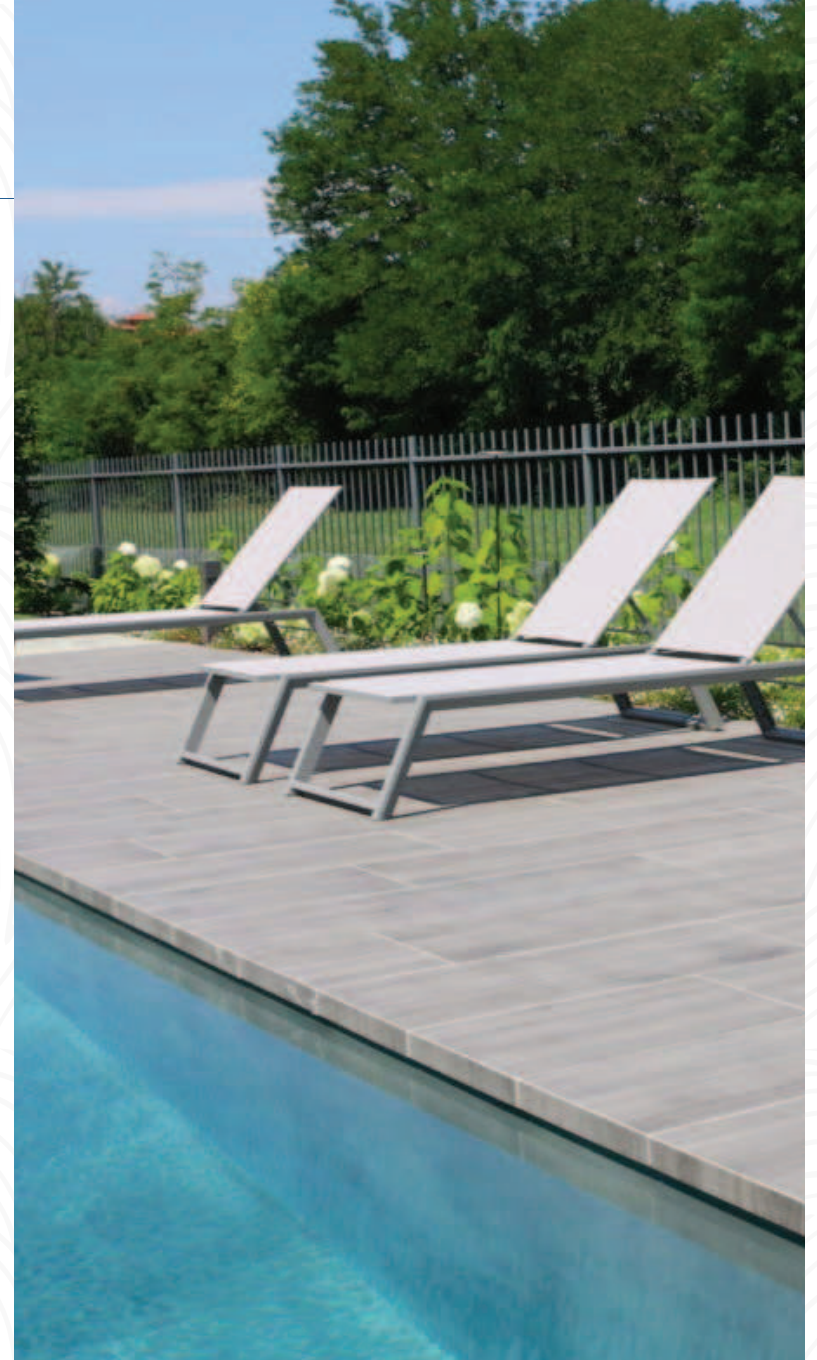

A study by the New England Journal of Medicine found that bathing in a hot tub simulates the beneficial effects of exercise. The result is that patients with type 2 diabetes who soak in a hot tub for 30 minutes a day, 6 days a week for 3 weeks, experience a reduction in blood sugar levels by an average of 13%.

7.0

Porcelain

Failaka has unique collection of high-quality porcelain, over 70 shades and textures, a diversity of formats and a specific range of pieces designed specifically for swimming Pools.

8.0 Mosaic

Swimming pool - not only closes the distance between people and water, but also establishes the connection between architectural space and natural elements; In addition to enjoying the scenery, it creates a state of mind. This is a quiet and relaxing place built in the brick wall structure. Can make people "find themselves in nature." Stars, oceans, sand dunes, swamps, green plants, flowers and other diverse natural landscape patterns inspire our design team's inspiration "touch", and carry out different design refactoring. Starting from the concept of "nature and change", we will transform the inspiration into a variety of patterns, colors and textures by studying the interactions between different ecological elements, such as the flow state of the sea when it flows over the beach. Each of the pool mosaics here is full of stories, water and sky, and feel the comfort of the world.

9.0 Fragrances

Failaka is the first company in Kuwait that has an approved cosmetic perfume for swimming pool and spas. An innovation that will transform this moment of relaxation into a new olfactory experience and thus increase the pleasure in the water and around the pool.

Our fragrances are the first cosmetic perfume for pool water, spas, sauna and hammam without essential oils.

In fact, smells and fragrances are strong stimulants of pleasure. They form part of us. They incite the feeling of sweetness, bitterness, pleasure and aversion.

Dehumidifiers

Even when you can not see it, moisture in the form of water vapour is all around us, held in suspension in the air. The relative humidity of the air in many cases determines the extent of corrosion of certain materials specially if the pool indoor.

Our wide range of units and operating temperatures ensure there is a system to fit every need.
